

Transforming Surveillance and Efficiency for Modern Asset Networks

In a world driven by innovation, staying ahead requires intelligent solutions that deliver safety, security, and operational excellence. AIQoD Gen AI-Based solution provides intelligent video analytics for monitoring battery swapping stations, EV Charging Infrastructure & ATMs across multiple locations in India. Our platform processes CCTV footage in real-time to detect anomalies, classify incidents, and escalate alerts to relevant stakeholders. Tailored for operations, strategy, and maintenance teams, the solution delivers unmatched safety, security, and operational efficiency while reducing costs and improving asset utilization.

Process Flow:

Features:

AI-Driven Alerts

Leverages AI to generate precise and timely alerts for anomalies and incidents. Reduces response time by ensuring actionable notifications.

Real-Time CCTV Feed Analysis

Processes live video feeds continuously to detect critical events instantly. Provides actionable insights to enhance situational awareness.

Scalability for Multi-Site Deployments

Supports seamless integration of new locations and assets. Scales efficiently to handle growing operational demands.

Multi-Channel Alert Notifications (SMS, WhatsApp, Email)

Delivers alerts across diverse communication channels. Ensures quick dissemination of critical updates to relevant stakeholders.

Automated Incident Tagging

Automatically categorizes incidents with relevant metadata. Simplifies incident review and facilitates quick action.

Human Activity and Intrusion Monitoring

Detects unauthorized access and tracks human presence in restricted areas. Enhances security by identifying threats in real time.

Workflow Automation

Streamlines incident management processes through automation. Reduces manual effort and improves operational efficiency.

Multi-Camera Format Compatibility (IP, Analog)

Operates seamlessly with both modern IP cameras and traditional analog systems. Ensures adaptability with existing CCTV setups.

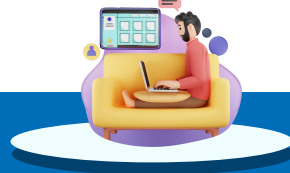

Benefits

90% Time savings

85% Reduced Operation Cost

User-friendly Interface

Seamless integration

You can also explore our other AI/ML-powered Procure to Pay & Reconciliation, Intelligent Document Processing, Touchless tickets handling/helpdesk solution, Virtual Assistant, Asset Management etc. that can help you in insightful automated decision-making and give ROI within months of implementation.
