

# Smart Accounts Payable

AIQoD 360 Cognitive Intelligence based Procure-to-Pay provides actionable data and insights for quicker decision making with real-time dashboards, that helps purchase and procurement functions to quickly act on vendor invoices and their payment schedules.

## PROCESS

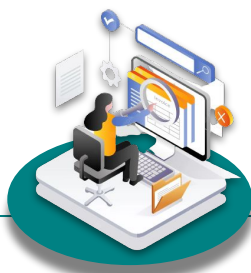

## FEATURES

### Invoice Extraction

- Pick up invoices from various sources e.g. folders, mailbox, etc.
- Document processing and splitting for invoice page extraction
- Extract header and line level items using Image Processing, OCRi & ML technologies
- Identification of data elements e.g. Invoice no, Vendor Name, Product details, etc
- Auto Correction of data to improve accuracy

### Invoice Validation

- Document type validation e.g. for Credit notes, invoices, etc
- Automated vendor creation checks in ERP/Accounting system
- PO validation & GRN/Delivery note checks
- Validation of Total Amount against line level item total
- More such 60+ Business rules validation for every invoice processed
- Additional rules can be easily configured using our Rule Engine

### Easy ERP integration

- Integrating your ERP system with an accounts payable (AP) automation solution can significantly streamline your financial processes, reduce errors, and improve efficiency.

### Tracking & Reporting

- Error alerts for duplicate & missing invoices
- Notifications for mismatched payments, rejected invoices
- Real-time data tracking for the status of payments and invoices
- Dashboards, KPIs, Metrics, and visualizations for real-time visibility into performance
- Creation & scheduling of automated reports to be sent to relevant parties on a regular basis
